1. This application is in condition for allowance except for the following formal matters:

The claims are objected to for the following informalities:

Claim 81 should be cancelled.

In claim 83, line 1, "wherein the sample particles comprise" should be changed to --further comprising--.

2. Applicant's arguments filed February 22, 2010 have been fully considered but they are not persuasive. Applicant argues that detecting whether or not capping is successful is the same as counting one particle. This is not persuasive because it does not take into account additional capping particles being attracted next to or on top of the capping lid. That is, successful/failure detection detects at least one, but does not identify the number of particles.

3. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
